INTRODUCTION

This work is shared to collate historical and emerging works of scientific exploration with integrated rigor. By connecting our knowledge and insights across all STEM studies, alignment, and actionable outcomes will now propel the manifestation of our highest order collective timeline.

PURPOSE

Provide quantifiable evidence that supports BIPM, and seekers the world over, in correcting a faulty International Bureau of Weights and Measurements system through reintroduction of historical measurement standards that will untap our potential within quantum exploration.

Standards that harmonized with the sacred geometry of universal order.

Standards that open the floodgate for exponential change in evolutionary potential.

FOREWORD

Since the awareness of consciousness, to understand existence, we have ascribed measurement to foundational constructs within the space time matrix of the human experience. These values lend order to our chaos, provide reference for collective consort, and benchmarks from which to further exploration and discovery.

Over millennia, the foundational units, and their respective value, have shifted in accordance with the driving forces of the eras. Be it variance through lost records, translation nuance, religious and political upheavals, or newly pioneered discovery, the fact remains that our current collective is functioning from a perspective of relativity that operates differently than it did historically. These shifts have led us into greater and greater separation consciousness and disconnection from Source, each other, and world around us; discontinuity that our minds have equally materialized with and without intention.

Today, as we continue to make great scientific strides across specialized fields from the micro to macro, most significantly within the quantum fields, the illusive question remains: How do we unify the collective discoveries to align with the leap underway in evolutionary consciousness and the human experience within.

This is where ancestral knowledge can be merged with modern science. Study of ancient Atlantean civilization reveals mirrored resonance between man's patterns and cycles and the implicit order of the observed natural world: The balanced flow of the creation and destruction energies orchestrated by the sun as "ruler" of the light. It is these precise frequency alignments that open the energetic doorway for advancement that, even in our present NOW moments, we struggle to understand.

The Divinity Codec reintroduces the Egyptian Royal Cubit as the universal standard unit of measurement. The significance of which is revealed in the recalibration of the true Speed of Light. This is the key to reconnecting humanity to the universal frequencies of Creation; unlimited Source energy. The following pages detail those precise measurement corrections that will support our collective evolutionary progress as we move away from material separation into an experience manifested through consciousness unification.

It is from all the hopes and dreams of Universal Peace and Harmony that these seeds are now planted. And So It Is. _ _ _ - - _ _ _ π

SHORT INTRODUCTION

Summary

This light paper is trying to motivate its readers to understand and act accordingly.

There is a new number in town its 186,624 (180x1.0368)

This correct number for the speed of light is directly connected to the ancient Egyptian ‘Royal Cubit.’

The speed of sound is 0.20376 ni/s.

It is a little bit spooky, but it seems everything can be derived from LIGHT SOUND, the very speeds of Light and Sound. Even force from centriFUBAR/centripetal motion, rotas (white holes?) and its antirotas that are pouring out galaxies non-stop.

Also, fundamentally it seems like modern measuring deep down are derived from an origin “cradle of life”, though still first set up by the Light. That is a Hell of a circle.

Imaging the wider effect, light numbers can have on us with regards to ‘balance’ with our ONE planet MEarth. It is Magnitude².

So, if from the few last centuries ago, from the beginning of our modern particularly good measuring systems. If these also were aligning to speed of Light (syncs) there would be room for improvement, from very approx. good to very precise.

Now, bring the ‘Divine ONE LLight &S0nd sySTEM,’ to an excellent standard. Exceed the speed it’s a question that matters – This is the message.

1 BACKGROUND and THE PRE-STORY

The speed of light is referred to as 299792458 m/s. One reason is this unlikely cos nature has no irregularities and that the link to the metric system is broken. Instead, we will try to introduce the constant 1.0368 (369 constant) that harmonises all numbers with the precise speed of light that is 300 000 000 m/s. The speed of sound is 333.333333 m/s.

Through history, several Rulers have introduced new measuring systems to both improve scientific knowledge and exercise control. The biggest human shift in measurement standards:

Moving from a duodecimal (12BASE) to a decimal(10BASE)
changed the ACCURACY of the reference points, and all measurements accordingly.

Separation from lost Sacred knowledge and 12BASE extrapolation, disrupted a Conscious flow that was previously in harmony with divine universal order in harmony with the flow, the flow of water, vibration, and light.

The Paper – ‘The ONE Light & Sound SySTEM’, The Precise Royal Cubit

Additionally, empirical ways of measuring have long since been replaced by modelling in super computers, and AI Mapping systems have covered every corner of the planet MEarth. Typical geospatial data apart from geometric data is hard to get accurate between time eras due to platonic movements. Overall, our metric system has errors that have been globally accepted for over 150 years. The modern approach is to jump from conclusion to conclusion with a few missed steps, and, honestly as humans we have polluted, disgraced, and disrupted more than just our material ecosystem.

It is in our belief that several measurements can be improved with better and more accurate geometric, geospatial measurements understanding. A hypothesis surfaces from these revisions:

If we could slow climate change by one year, wouldn't it be well worth it?

What if slowing destruction shifted into regeneration and harmonic construction?

The best way to unite behind the science is through precision instead of approximation!

A major result of this disruption? The speed of light has been recorded and referenced as 299792458 m/s. This number comes under accelerating scrutiny the more we understand that there are no irregular numbers in divine universal order.

The task at hand: Leveraging the principles of Sacred Geometry aligned with ancient standards to bridge the original past with the present.

The first step is reinstating the Egyptian Royal Cubit as the universal standard measurement unit.

The second step is practical application of this measurement through the laws of Sacred Geometry, allowing introduction of the constant 1.0368 (369 constant). This introduction harmonizes all numbers with the following core implications:

PRECISE SPEED OF LIGHT
300 000 000 m/s

And accordingly,

PRECISE SPEED OF SOUND
333.333333 m/s

Resulting in One of Six key reference numbers:

Quantum mechanics(QM) is a fundamental theory in physics that provides a description of the physical properties of nature at the scale of atoms and subatomic particles. It is a correct holistic (Scalar) analysis of our known reality- meta scalability from subatomic to above macroscopic. It is a complex and young science not easy to fully comprehend. It is the foundation of all quantum physics including quantum chemistry, quantum field theory, quantum technology, and quantum information science.

Though QM is a viable learning source for artificial intelligence, the following introduction to the procedures is the game changer:

BASE12 MOD9 +ONE numeric mesh

This adjustment will aid processing interaction with human's and all being's emotional soft mechanics:

This paper aims to correct and amend 24 measurements to start with,

After review, we wish the Collective to:

1. Correct faulty scientific measurement approximations
 2. Validate RA's Egyptian Royal Cubit as the standard measuring unit to reintroduce into our modern world
 3. Leverage the enclosed Conversion table on-line to compare the revised Light/Sound numbers for better understanding of unification from micro to macro computational scale
- 1-3. Help slow and reverse human impacts on the ecosystem

As you know our entire ecosystem has now become vulnerable to human activities and settlements; the choices made in the unconscious state. REunification with divine order will provide humanity with the knowledge required to course correct and exponentially evolve in a free flowing, harmonic energetic state from which to manifest.

In this short paper I am aware this is conclusion based and poorly written. I am sorry but the numbers are correct. Now it is a 24 point-chapter draft open for analysis improvement for commentary, corrections, and input until the 30th of June. This will hopefully amend this 'Light/Sound-thesis and the future could brighten up a little little bit.

4 The Law of numbers, an ALL-APPLYING CODE #CODEPAISLEONA AND CODEPAISLEO #CODEPAISRAMA AND CODEPAISRA

Its clear humanoids cannot agree on religion, territory, currency, powers, or any external values. This is where Light workers come in, to work on common Internal values fairness, equity, and consciousness. The Science & Spirituality must also reflect the in-values and be absolute correct. This area is where in-numbers corresponding with the ancient original ONE supreme traceable number system.

Unfortunately, time has become the essence to reach IN-UNIFICATION we must accelerate conclusion x conclusion = conclusion⁴

Old ways to verify information is obsolete. Jump our way forwards is the only way, with a few hits and misses. ‘The Divine Ratio’ is correct on its own accord, you cannot prove it wrong, U just cannot.

All I can say I know these numbers are correct, the future could brighten up a little bit.

Numbers, numbers by recognition are autodidact when looking deeply at numbers daily. Certain numbers repeat over and over, leading to harmonic numbers of scales forming patterns.

Numbers seems 2b linked to everything – 4us everything is inter-connected in random order or orderly randomness. Animals see numbers for what they are. Only humans try to manipulate numbers to their advantage not accepting the natural world not accepting themselves, without in-values.

Why we are not looking to external system change we need with inner work break the chain from within away from ‘Anno Mundi,’ that is the powering chain. Need to stick to inner commands.

If we get all numbers to show wat they are, by understanding the in-numbers we can approach and unblind the incorrect external format in true #Togethernessship.

In this short paper I am aware this is conclusion based and poorly written. I am sorry but the numbers are correct. Now it is a 24 point-chapter draft open for analysis improvement for commentary, corrections, and input until the 30th of June. This will hopefully amend this ‘Light/S0nd-thesis and the future could brighten up a little little bit.

*All+ Sacred Geometry Decoders (SGD) fellows work on common Internal values those see connectivity and openness as a spiritual asset way away from materialistic ownership (the old).

	Sound speed km/h 1200 km/h Based on 333,333333 m/s Is sound, the light's medicine 📌 If light is immediate – Wat is sound?	

6:2 Lightning & Thunder - The speed of Sound 0.20736 ni/s in plain Light

There is a Time/Space synchronicity between Light and Sound.

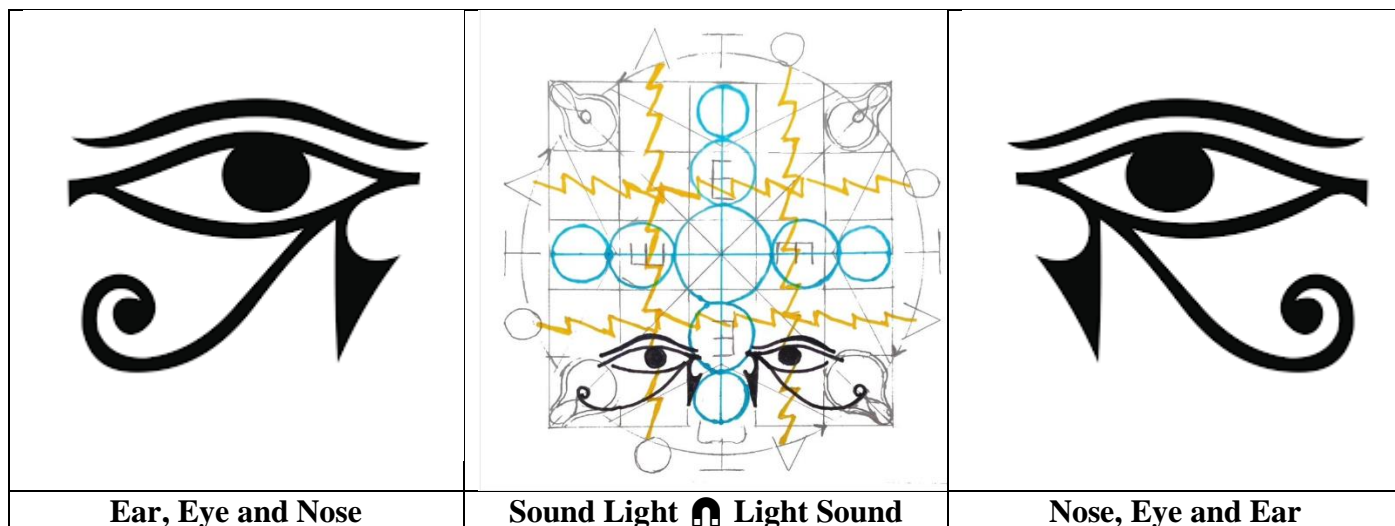

Light is immediate the sound tails the nile 4.82253087s later.

$$4.82253087 / 3600 \times 1000 = 74.6496 \text{ ni/h} \times 60 = \text{Space diagonal } \times 2 \text{ of the Light chamber } 12+12 = 24$$

Count the number of seconds between the flash of lightning and the sound of thunder.

The sound speed of 333.333333 m/s is 1/900000 of light speed 300,000,000 m/s which is a perfect match with Lightnin & Thunder. Wat is being said is the sound that penetrates the volulight is proportionate to the light speed. Sound has the same proportion also in darkness, mystery2.

Vision - Hearing - Breathe

6:3 Resonance and fREquencies (wavelengths)

Room mode formula, 4 rectangular shape is $333.333333 \times (\text{Length m} \times 2)$

Ancient pyramid structures were constructed with precise 12-base measurements to create specific electro magnetic frequency resonance using light/sound angles within the space.

ELO – Theory

Every megalithic room holds an electromagnetic charge.

If you are a sensitive person CALM and facing the certain direction you can feel IT and engage with the energy.

Though the flow is low, the more aligned the space diagonal is with the unit of the light/sound the more effect it will have on you.

Eg. If a space is 2,5x3x4.5 m = $\sqrt{(2.5^2 + 3^2 + 4.5^2)}$ = A near perfect body diagonal 6 m (0.5 unit)

The harmonic scale is to sound frequencies as the electromagnetic scale is to light frequencies. Working backward and forward between the true speed of sound and the speed of light, with their exact proportions, reveals the correlated (pairing) frequencies, or angles to be plotted on the 1080 circle. The matrix of space time coordinates.

The Sound travels Light and darkness, doesn't change due to the fabric.

It resonates through space and volume; the source of sound is a mystery.

If there is no nothing (emptiness) then there is non-silence, why?

It is constant to Light even in darkness. The matter is the medium not the fabric.

Wat is being said is the sound that penetrates (plough) the volulight is proportionate to the light speed.

The sound constant is tiny 2.0736 (e-6) 12⁴.

Sounds role in static gravitational energy -

This sound direction and volulight/dark correlation generates a rotation of its traveling direction.

Once an object is in motion, potential energy is converted to kinetic energy, which is the energy of motion.

Here is the thing if you don't do music, don't play instruments, or read notes. So, the very numbers are helping to focus on the balance between sound and light, the scaliness itself. The mesh of fREquencies (vibration) and light.

'The Solfeggio fREquencies' are a very interesting sequence, to be synced with the Royal Cubit.

Anyone up for this task?

The Sound & Ihy's Chamber [3][4][5][6] in The Great Pentainmid ✓

For the Pentainmid (pyramid) to produce high frequency resonance, the Queens Chamber was constructed in a way that converted hydrogen into free electrons through pressurization, voltage, and electromagnetic radiation. With pressure mounting, the temperature of the gas increased, and partial release of electrons took place. There are copper terminals in the doors to channel the EM radiation of stars into the system. Those align with the shafts. The alignment did not need to be perfect, just enough for X and gamma rays (which can pass through the blockage) to reach the copper. Then the ionization of hydrogen took place.

The ancient Egypt was no religion, the so-called deities were symbolising reflection of the highest order. The Light or even the Black Light transformed into daily life, the natural way.

After achieving the precise Royal Cubit's function what can be achieved? A lot, it seems the ancient Egypt was not only a fair and just society where man and woman were equal and respecting the elements in all levels. Old Kemet also got the sciences right for an extraordinary utopia.

The three Giza Pyramids were not about status the 51.84 degrees x12 reflecting sound PI, the Light vibration for harmony. Balancing the scales with the libra always striving for liberation.

Pure light self-bending just like numbers – Scalar blocks, self-building blocks

11 CXIIIIXC - Entering the Golden Age

Active Light/Sound

In-Light the ultimate scalar wave (constant SOLitar wave), forceful and immediate, comes with a settle vibration, sound vibration. Enforced throughout the universe giving life, Reactivating silent matter everywhere. In double sense with and without inertia. Flow with flow one can say. From Poynt blanck then levels of inertia. The natural existing course is our cause way for existence. Its abt navigation, knowledge and understanding can these merges, yes, they are. - IN Togethernessship of the REalms.

Passive Light/Sound (Black Light, Silent Sound)

Assume the existence of a mind world where energy is constant and on a quantum level the collective brains are able chip in/out to this plane then no driving source be needed apart from a mindset (participation) – motion with zero trust.

Consciousness

“Awakening for me was becoming conscious as an eternal being outside of the human experience. The KNOWING that continues to occur through ongoing validations. The relationship with Source connection that has created this playground. The frequency that drives my exploration...:)

Recommending a materially based solution, like recalibrated metric values. This is where "being in it" though "not being of it" comes in

Mind, conscious or unconscious, drives material manifestation.

The perspective of being "in it" and have the desire for what gets shared to be a catalyst for more conscious, vs unconscious materialization by the collective.

My experience since awakening has been sheer emotion behind desire sets in motion material consequences. This is experienced as ongoing synchronicities, zings that send electricity through me, and events that occur as gifts miraculously aligned with my conscious steps. Heartfelt Emotion Manifests Motion.”

12 EXAMPLES (12:1-12:6) 4(4)

12:1 The Polymid vs The Polyinmid

“It’s not a Pyramid, it’s an Octopus”

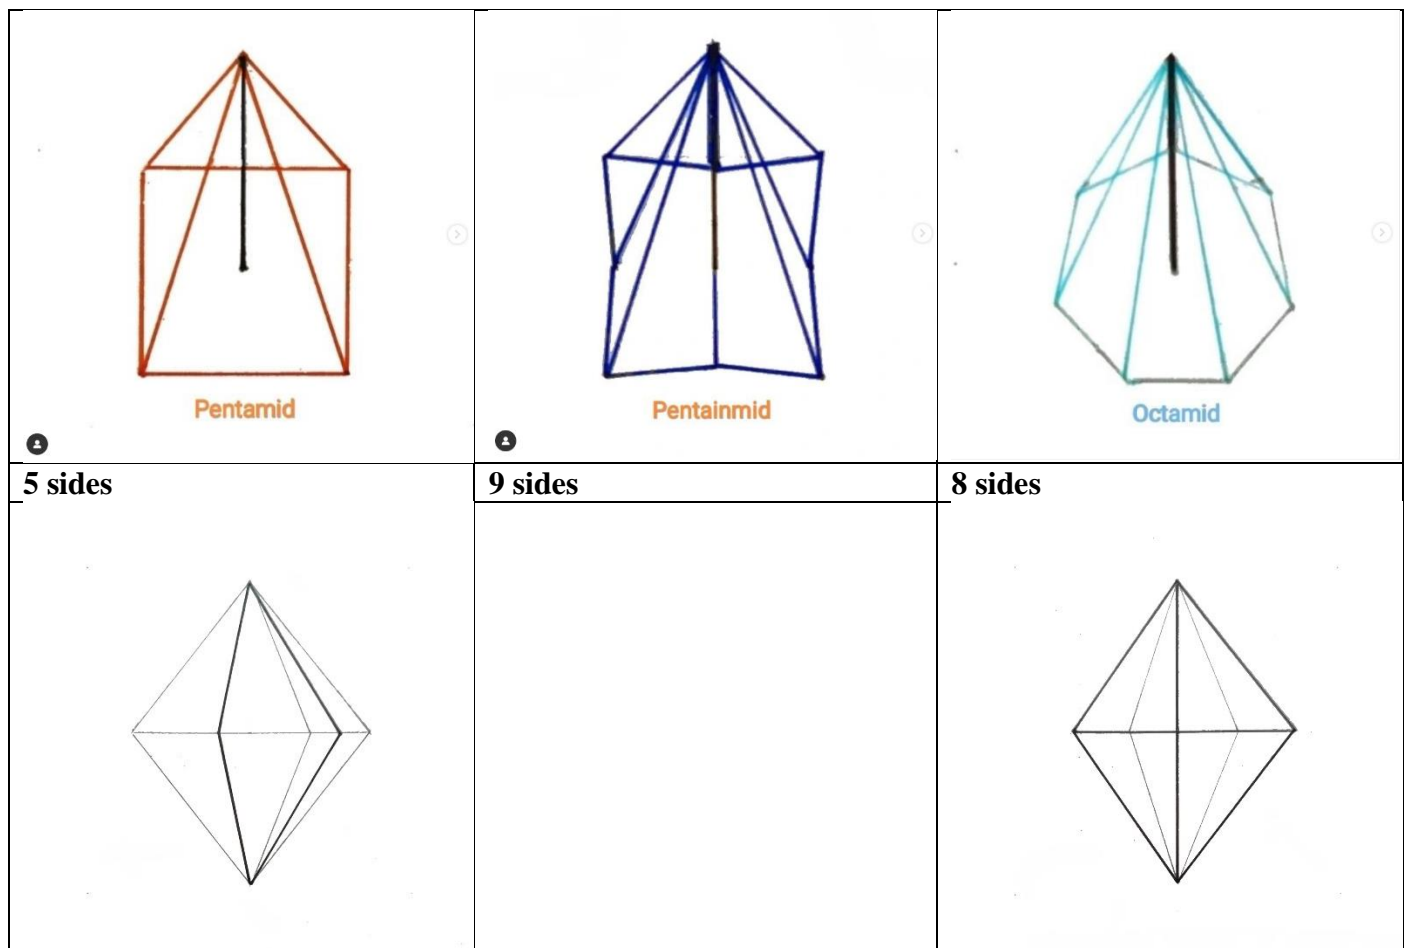

Ask yourself, you know the pyramids have 8 sides not 4, Right – So it’s not a pyramid!

It’s an octahedron with a waist. I don’t know its formula, its imprint is $\sim 1/220$. We need a math wizard to come up with this formula - ESCARPMENT (inclination, indentation) line (nrg-line)

Missing shapes – Polymid (Polygon+1) Polyinmid (Polygonx2+1).

- A Polymid is any Polygon displaying its base and sides with a centre in 3d
- A Polyinmid is any Polymid with a side inclination.

E.g., a Pentamid has 5 sides a Penta-inmid has nine sides.

$691.2 / 311.04 \times 5.4 = 12$

12:6 The PRECISE size of The Sphinx in Royal Cubits proving that the Great Pyramids are indeed related, older that the traditional view and corresponding well with the water erosion theory

The use of scalar wave form technology dates to at least the final period of the Stone Age based on the Sphinx age. Using the Recalibrated RC measuring values, new discoveries from this ancient code will continue paving our evolutionary runway.

It is believed to be the oldest carved limestone ever found in the Giza Plateau. The colossal decorative sphinx art was made by Mesolithic people 8,000 years before the ancient Pharaohs temples were built and 10,800 years before AD.

One piece of possible 2 carved limestones discovered is more than 12,823 years old - making it the oldest of its kind in Egypt.

The colossal decorative sphinx art was made by Mesolithic people 8,000 years before the ancient Pharaohs temples were built and 10800 years before AD.

The 34.992 metre-long piece of limestone was covered in sand since it was rediscovered in the Giza Plateau during its early excavations. 1930 "The Sphinx" was finally dug out by the Egyptian archaeologist Selim Hassan.

It was found approximately 1.5 metres below the surface and next to the present course way.

Archaeologists has traditionally dated the specimen to an early Mesolithic period (the reign of King Khafre (c. 2575–c. 2465 BCE).

New findings suggest it pre-dates by up to 8,100 years many other known Mesolithic Temples from the 'Old Kingdom' in Egypt, discovered in upper and lower Kemet. The Sphinx Water Erosion Theory—that suggests it's much, much older. That the Sphinx is in fact 12,823 years old.

The purpose of the recumbent Sphinx is not known but its proportions look like many sphinx art decorations seen on early Neolithic locations.

The Divine ONE L1ght & S0nd sySTEM, the unifying in-numerology. 12-based MOD9 +ONE universal maths precisely coordinated w/ the Speed of Light to the Rock of Eternity.

Assume the Light and the Sound generates Phi Φ rotation that would be our eyes and ears protecting the spine throughout our embodied life experience. Is the spine our body diagonal, that both separates you from us and at the same time inter-connects us all in everything?

FOCUS – Disciplined June >>> Result in July UNICORN

TAKEAWAYS

- **ALL numbers are inter-connected in ONE, all beings included.**
- **There are different planes of REality, the usage of Light numbers UNIFIES.**
- **The Resonant Frequency is created by the sound and light patterns transmitted through the Pineal receiver. Light as immediate followed by Sound creates pervasive penetrating rotational pattern > ROTAS**
- **Current calculators are misaligned and should be REconfigured to work with humanity.**

The Light instant at all bodies while the sound intensely interconnects them, this obviously takes some longer time, ROTAS generates gravity and electro . Many many repetitive patterns REsponds to simulation. 4full circle, a future question is how to divide electromagnetism into light and sound (vibration).

So, if Light is resonating vibration (S0nd). What penetrates ears & hears ALSO resonates in vision (L1ght).

What is going on in the four faced Pentainmid (pyramid), through brain chambers and connecting gallery, still an enigma. Thus, the numbers are clear and pointing us into solvage = UNDERSTANDING

Align with the Light and Sound is the way to coherence, which is the message.

Always combine your auric field in slowing climate change

The encoding of data by discrete bits was used in the punched cards invented by Basile Bouchon and Jean-Baptiste Falcon (1732), developed by Joseph Marie Jacquard (1804), and later adopted by Semyon Korsakov, Charles Babbage, Hermann Hollerith, and early computer manufacturers like IBM. A variant of that idea was the perforated paper tape. In all those systems, the medium (card or tape) conceptually carried an array of hole positions; each position could be either punched through or not, thus carrying one bit of information. The encoding of text by bits was also used in Morse code (1844) and early digital communications machines such as teletypes and stock ticker machines (1870).

Why is c the symbol for the speed of light? -<https://math.ucr.edu/home/baez/physics/Relativity/SpeedOfLight/c.html>

Speed of light is now universally represented by symbol 'c'. This symbol originated from the initial letter of the Latin word "celerity" meaning "swift" or "quick". This symbol was used by Weber and Kohlrausch in their papers in 1856.

The brain's left half is primarily responsible for speech and abstract thinking. It also controls the right side of the body. The right side of the brain is responsible for image processing, spatial thinking, and movement in the left side of the body.
